

THE 1982 DEUEL CONFERENCE ON LIPIDS

Advisory Board

April, 1981

Erwin H. Mosbach, *Chairman*
Department of Surgery
Beth Israel Medical Center
10 Perlmans Place
New York, New York 10003
(Phone: 212/420-3816)

Donald M. Small, 1983
Edwin L. Bierman, 1984
Erol R. Diller, 1985
Howard A. Eder, 1986
Daniel Steinberg, 1987

Frank T. Lindgren, *Treasurer*
Donner Laboratory
University of California
Berkeley, California 94720
(Phone: 415/486-4604)

Richard J. Havel, *Local Arrangements*
Cardiovascular Research Institute 1315
University of California
San Francisco, California 94143
(Phone: 415/666-2226)

Ralph T. Holman, *Funding*
The Hormel Institute
University of Minnesota
801 16th Avenue N.E.
Austin, Minnesota 55912
(Phone: 507/433-8804)

Program Committee

Scott M. Grundy, *Chairman*
Department of Medicine
Veterans Administration
Medical Center (111G)
and University of California
San Diego, California 92161
(Phone: 714/453-7500
ext. 3648)

Michael C. Scholtz, 1983
William R. Hazzard, 1984

The Deuel Conference on Lipids was organized by a small group of eminent West Coast scientists interested in lipid research, to provide for the western states a conference on lipids similar to the Gordon Conferences. Shortly after it was organized, one of the founders, Harry Deuel, died and the conference was named in his memory. The conference has been held annually in various West Coast locations, but in recent years it has remained in the Carmel area.

Generally the conference is devoted to one or two subjects and both basic and clinical material is presented. The conference consists of five sessions beginning Thursday morning and running until Saturday noon and is held in late February or early March. Each session is introduced by a speaker chosen for his high stature in the field, and he reviews his own and related work. This is followed by a few small presentations and general discussion led by a chairman. The last session is often devoted to discussion of a disease process. Informality and wide interchange of information and views are encouraged by limiting the size of the group, by the round table format, and by not recording or publishing the discussions.

Until 1968, the conferences were organized by Dr. L. W. Kinsell, and since that time they have continued under a broadly based rotating leadership. The original policies of the conference have been preserved to keep within the traditional budget, to maintain the informal atmosphere, and to provide the depth and breadth of expertise necessary for a high quality conference.

The attendance has been kept less than 100 persons to insure informality. A few established investigators in the field of lipids, mostly from west of the Continental Divide, are regularly invited to attend. Lipid scientists in the west are informed of the coming program and are invited to apply for a place around the table. The Program Chairman selects participants on the basis of relationship of the research interests of applicants to the program. These participants are expected to provide their own travel and living expenses. All attendees are expected to be present for the entire conference.

Because of the limited size of the conference, organizations which contribute \$1000 have the privilege of sending one scientist to the conference and contributors of \$1500 or more may send two representatives. The funds collected are used to defray expenses of the principal speakers and other conference costs.
